

You may need to cut your clips so that you can move them around and delete unwanted section. To do this, pull a lclip into your timeline, then choose "Split clip at Playhead"

Edit	View	Markers	Advanced
Undo Move			⌘Z
Redo Split			⇧⌘Z
Cut			⌘X
Copy			⌘C
Paste			⌘V
Clear			
Select All			⌘A
Select Similar Clips			⇧⌘A
Select None			⇧⌘A
Crop			⌘K
Split Video Clip at Playhead			⌘T
Create Still Frame			⇧⌘S
Special Characters...			⇧⌘T

You may also wish to extract existing audio so that you can replace it with other audio. iMovie allows you to import .wav, .aif, mp3s and Quicktime.

Advanced	Window	Help
Extract Audio		⌘J
Paste Over at Playhead		⇧⌘V
Lock Audio Clip at Playhead		⌘L

This will place your audio on it's own layer. You will need to "unlock it" in order to delete, cut, or move it.
